DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Crow (US 2004025490).

(Claim 1)

Crow discloses in figure 8C, a method in a data processing system for storing data in a file system, the method comprising determining whether space is available in an inode for a file in the file system; and responsive to space being available, storing the data in the inode (paragraph [0048], [0053]).

(Claim 2)

Crow discloses in figures 8A-8C, and 10, to determining whether additional data being present; and responsive to the additional data being present, storing the additional data in a partially filled block of another file (paragraph [0038], [0039], [0042] and [0044]).

(Claims 3, 11,18)

Crow discloses in figures 8A-8C, and 10, to responsive to spacing being unavailable, storing the additional data in a partially filled block of another file ([0034], [0038], [0039], [0042], [0044] and [0048]).

(Claims 4,12,19)

Crow discloses in figure 8C, wherein the partially filled block being a last block of the another file (paragraph [0042]).

(Claims 5,13,20)

Crow discloses in figures 5-10, wherein the space being located in an extension area in the inode.

(Claims 6,14,21)

Crow discloses further comprising determining whether a file size for the data being divisible by a block size for blocks in the file system; and if the file size is divisible by the block size, storing the data in a block (paragraph [0031], [0034]).

(Claim 7)

Crow discloses further comprising determining whether space being available in the inode to store the data; and responsive to room being unavailable in the inode, storing the data in a partially filled block of another file ([0048]).

(Claim 8)

Crow discloses in figures 3 and 8C, a data processing system for storing data in a file system, the data processing system comprising a bus system; a communications unit connected to the bus system; a memory connected to the bus system, wherein the

Art Unit: 2821

memory includes a set of instructions; and a processing unit connected to the bus system, wherein the processing unit executes the set of instructions to determine whether space is available in an inode of the file in the file system; and store the data in the inode in response to space being available (paragraph [0048] and [0053]).

(Claim 9)

Crow discloses in figure 8C, a data processing system for storing data in a file system, the data processing system comprising determining means for determining whether space is available in an inode of the file in the file system; and storing means, responsive to space being available, for storing the data in the inode (paragraph [0048] and [0053]).

(Claims 10,17)

Crow discloses in figures 5, 8C, and 10, wherein the determining means being a first determining means and the storing means is a first storing means and further comprising second determining means for determining whether additional data is present; and second storing means, responsive to the additional data being present, for storing the additional data in a partially filled block of another file (paragraph [0042]-[0044]).

(Claims 15,22)

Crow discloses in figures 8A-8C, and 10, wherein the determining means being a first determining means and the storing means is a first storing means and further comprising: second determining means for determining whether space is available in the inode to store the data; and second storing means, responsive to room being

Art Unit: 2821

unavailable in the inode, for storing the data in a partially filled block of another file ([0034], [0038], [0039], [0042], [0044] and [0048]).

(Claim 16)

Crow discloses in figures 3, and 8C, a computer program product in a computer readable medium for storing data in a file system, the computer program product comprising first instructions for determining whether space is available in an inode of the file in the file system; and second instructions, responsive to space being available, for storing the data in the inode (paragraph [0048] and [0053]).
